A yeast cell has 6000 different yeast genes. Like any living thing, yeast is made up of chromosomes; there are 16 different chromosomes in yeast compared with 23 in humans. The double cell wall may have bud scars (seen in Figure 1 to the right), which are caused by budding, i.e. the cell reproducing itself. There can be up to ten such scars, which cover the cell totally, after which the cell ...

The first instance of social organization, on Locke's view, is the development of the family, a voluntary association designed to secure the propagation of the human species through successive generations. (2nd Treatise §78) Although each individual in the state of nature has the right to enforce the natural law in defence of property interests, the formation of a civil society requires that ...
