OECD Observer: Sections » Economy . In a 1995 study of investment and loan risk data for 52 countries, Alberto Ades and Rafael Di Tella found that an increase of US\$4,400 in per capita income would improve a country's ranking on a corruption index (0 for total corruption, 10 for total integrity) by two points. An increase in exposure to competition would also lead to an improved ranking.

The economics of fascism refers to the economic policies implemented by fascist governments. Historians and other scholars disagree on the question of whether a specifically fascist type of economic policy can be said to exist. Baker argues that there is an identifiable economic system in fascism that is distinct from those advocated by other ideologies, comprising essential characteristics ...

Supply-side economics is a macroeconomic theory arguing that economic growth can be most effectively created by lowering taxes and decreasing regulation, by which it is directly opposed to demand-side economics. According to supply-side economics, consumers will then benefit from a greater supply of goods and services at lower prices and employment will increase.
