History and name. The name prostaglandin derives from the prostate gland, chosen when prostaglandin was first isolated from seminal fluid in 1935 by the Swedish physiologist Ulf von Euler, and independently by M.W. Goldblatt. Prostaglandins were believed to be part of the prostatic secretions, and eventually was discovered to be produced by the seminal vesicles.

Diabetes is a serious and growing problem in the United States. Behavior change, diet, and exercise are first in the line of treatment for this chronic disease. However, diabetes is a progressive disease, and these techniques will only work for a small portion of patients. Oral medications will eventually be necessarily incorporated into treatment plans in order to preserve control of the ...
