Oracle White Paper—Setting up Oracle 11g Data Guard for SAP customers • Efficient utilization of system resources - A physical standby database can be used for backups and read-only reporting, thereby reducing the primary database workload and saving valuable CPU and I/O cycles.

### **Setting up Oracle 11g Data Guard for SAP customers**

since the last backup; this also reduces the costs of bandwidth consumed for cloud backups. VMware ESXi and Hyper-V Host Bare-Metal Recovery . Increase resilience of your infrastructure by backing up your ESXi, Hyper-V and Citrix Hypervisor hosts and restoring entire systems (not just Virtual Machines) to the same or dissimilar hardware, avoiding the need to reconfigure your hypervisor systems.

### **DR Backup Appliances - StoneFly**

In this disaster recovery and business continuity course, you will gain the skills to identify mission-critical continuity needs, define sources of risk, create an incident response team charter, implement a Business Continuity Management System (BCMS), and improve organizational resilience.

### **Disaster Recovery and Business Continuity Training ...**

The Problem with DRaaS today. The Disaster Recovery-as-a-Service (DRaaS) market gets a lot of buzz, but end users still find it challenging. Many of the products in the market today offer a DRaaS solution in addition to, or separate from, an overall data protection strategy, often pulling the focus of IT away from their current datacenter investments and momentum.

### **Disaster Recovery as a Service (DRaaS) with Veeam**

The investment of time and effort to patch one multitenant container database results in patching all of its many pluggable databases. To patch a single pluggable database, you simply unplug/plug to a multitenant container database at a different Oracle Database software version.
