Project charter assumptions identify gaps in knowledge that must be filled prior to the project's inception. Because waiting for all information, events, and circumstances that affect the outcome of the project to be factually determined is impractical, assumptions are made so that the project can proceed. To avoid the tendency of being accepted over time as fact, they should be analyzed and ...

Making Project Charter Assumptions: Analysis and Management

Abstract. Project management and business analysis are in fact two disciplines that are becoming more and more strategic for many companies. Project management focuses on the creation of the "product, service, or result" of the project in order to meet its objectives.

Project management and business analysis - PMI

Critical Path Analysis and PERT are powerful tools that help you to schedule and manage complex projects. They were developed in the 1950s to control large defense and technology projects, and have been used routinely since then. As with Gantt Charts , Critical Path Analysis (CPA) or the Critical Path Method (CPM) helps you to plan all tasks that must be completed as part of a project.
