

Sudden Unexpected Death In Epilepsy Continuing The Global Conversation

Sudden Unexpected Death In Epilepsy

SUDEP deaths are often unwitnessed with many of the deaths occurring overnight. There may be obvious signs a seizure has happened, though this isn't always the case. The cause of SUDEP is not yet known. Researchers are investigating a range of possibilities such as the effect of seizures on breathing and the heart. SUDEP occurs in approximately 1 per 1000 people with epilepsy (1

Sudden Unexpected Death in Epilepsy - SUDEP | SUDEP Action

What is SUDEP? SUDEP is the sudden, unexpected death of someone with epilepsy, who was otherwise healthy. In SUDEP cases, no other cause of death is found when an autopsy is done. Each year, about 1 in 1,000 people epilepsy die from SUDEP. This is the leading cause of death in people with uncontrolled seizures.

SUDEP | Epilepsy Foundation

There are at least three epilepsy-related deaths a day in the UK. SUDEP Action is dedicated to raising awareness of epilepsy risks and tackling epilepsy deaths including Sudden Unexpected Death in Epilepsy.

SUDEP Action | Making every epilepsy death count

Introduction. In a forensic setting, deaths due to seizures, either epileptic or other, present a well-known problem. Cause of death may be established due to non-specific evidence such as a history of seizures, the circumstances under which the deceased was found, discharge of urine or faeces, tongue biting or perhaps subtherapeutic levels of anti-convulsive medication in blood.

Reduce the risk of sudden infant death syndrome (SIDS) It's not known why some babies die suddenly and for no apparent reason from sudden infant death syndrome (SIDS), or cot death.. Experts do know placing a baby to sleep on their back reduces the risk, and exposing a baby to cigarette smoke or allowing them to overheat increases the risk.

Reduce the risk of sudden infant death syndrome (SIDS) - NHS

Clonazepam is usually used as an "add-on" medication for people who continue to have seizures while taking other seizure medicines, or sometimes as a medication of last resort after most others have failed.

Clonazepam | Epilepsy Foundation

An atonic seizure (also called drop seizure, akinetic seizure or drop attack) is a type of seizure that consists of partial or complete loss of muscle tone that is caused by temporary alterations in brain function. These seizures are brief - usually less than fifteen seconds. They begin in childhood and may persist into adulthood. The seizure itself causes no injury, but the loss of control ...
